Mail Order Frequently Asked Questions

How do I prepare the order?

A completed mail order consists of a filled in mail order form together with a cd, dvd or a usb drive with your photos. The photos should be placed in two folders one that holds the background image and the other that holds the tile photos. Refer to below:

Name ▲	Size	Type
 Background 18 x 24		File Folder
 Tile Photos		File Folder

If ordering multiple mosaics please create a new folder with mosaic size for each mosaic as indicated above.

How do I order reprints and do I get a discount?

When filling in the order form simply indicate how many reprints you require in the Quantity column. A 40% off the RRP applies to all same size reprints.

How many photos do I need to provide?

As many as you can. As a rule of thumb the more photos you have the better the final mosaic. We have created great looking mosaics from as little as 400 photos and as many as 12,500 photos. At minimum you will need about 800 photos but anything over 2,000 produces a good mosaic.

What if I don't have enough photos?

Tile photos are small and don't need to be of high quality. You can include photos from your mobile telephone, your facebook galleries or even sample thumbnails from your wedding. Also you can have your developed paper photographs scanned at any good photo processing shop.

Can I send you my old developed paper photographs?

Unfortunately no we only accept digital photos, However you can get your developed paper photos scanned to a cd or dvd at any good photo processing place.

What about Black and White photos?

Some of our best work comes from black and white photos. You can also use combination of black and white together with colour photos. We can even create a black and white mosaic from your colour photos.

How long does it take?

On average from the time we receive your order it will take about five working days. These times may vary due to postal delays and seasonal peaks.

Do you send the cd, dvd, usb drives back?

We only send back USB drives together with the ordered mosaic. Cds and dvds are too big for the postal tube we use. We suggest that you make backup copies of your entire photo collection especially if they have been specifically scanned before you send them to us. If you are having difficulty with this process please let us know.

Should I use registered mail?

Unfortunately we cannot take responsibility for items lost in the mail before they arrive to us. Therefore we suggest you always use registered mail and just in case make backup copies of all of the photos you send.
